**Seminar leaders:** Andy Haskins and Mark Rouse

**Registration:**    Not required, but is preferred to know # attending  
Register by email to [judy@nerfmc.com](mailto:judy@nerfmc.com)  
Walk-ins are welcome

**Cost:**                None

### **What We will Cover (An Overview)**

The Ministry System:

Also known as the Volunteer System, the Ministry System determines how you mobilize people for significant ministry at your church. God created people to serve. It's part of how they grow as disciples. If you don't have a system in place that helps them get plugged in, you will be hurting both yourself and your potential, untapped leaders.

You can never have too many volunteers. Encouraging people to serve will strengthen your church on every level. Ultimately all of the eight systems will be run by volunteers, so you need as many dedicated servers as possible. What steps do you need to take to create a volunteer system that makes people want to get involved and do the things that you can't hire people to do?

The Ministry System helps pastors and leaders **provide a ministry ladder (next steps) and determine expectations & qualifications for each ministry area.** When it comes to the Ministry System, a key word is clarity - we have to know what the qualifications are up front and be able to communicate them effectively. Special emphasis is given to showing the next steps so that you can tell people what the expectations and qualifications are for service in a particular ministry.
